Thematic Workshop 1**

March 2024
**Culture & Place-making
Thematic Workshop 3**

September 2024
Transition Event

January 2024
**Climate & Urban Nature
Thematic Workshop 2**

May 2024
Hackathon

3 thematic workshops

Urban Insights Data Lab

In each of the following workshops, we deep-dive in one theme. We get inspiration from leading Danish and international experts working on that theme.

Then we work hands-on in groups to identify data sources and develop methods that can be tested and applied systematically in our cities and neighbourhoods.

Theme 1

Health & Wellbeing

Wednesday, December 6, 2023, 2:00 – 4:30pm

What drives health and wellbeing in cities and how can data highlight this?

What are the critical data gaps on health & wellbeing?

What can cities do to improve the health and wellbeing of residents and local communities using data-driven approaches?

Theme 2 Climate & Urban Nature

Wednesday, January 10, 2024, 2:00 – 4:30pm

What makes cities climate-friendly and adaptive?

What can cities do to improve biodiversity and reduce resource use?

What kind of data do we gather to understand whether we are on the right track?

Theme 3

Culture & Place-making

Wednesday, March 6, 2024, 2:00 – 4:30pm

• How can we ensure that those we are building for, love what we have built for them?

• What kind of data about the local context should inform the decisions we make when we design, develop and transform neighbourhoods?

Hackathon

Thursday May 2 - May 3, 2024, 9:00am - 5:00pm

UIDL is a community of city advisors, private companies, municipalities and cutting-edge data-companies that are committed to creating better cities. We welcome you to join our community on a 2-day hackathon.

Who knows? Maybe you will end up working side-by-side with your next employer, colleague, collaborator, client or getting an idea for your next entrepreneurial adventure.

Transition Event

Thursday, September 5, 2024, 2:00 – 4:00pm

At the closing event, we will be ready to go on-air with our brand-new data collaborative – and hope that you will want to be part of it too!

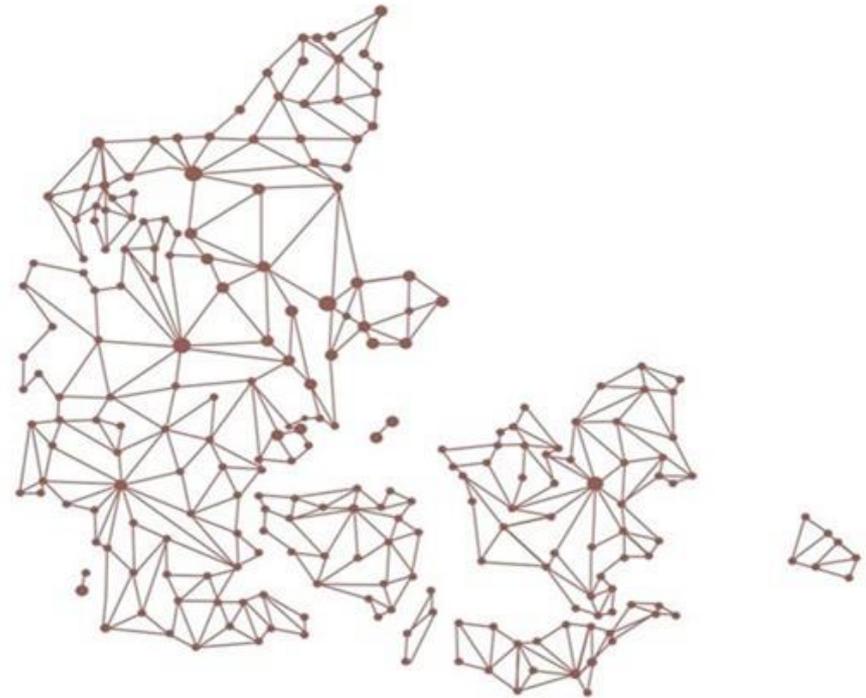

For two years people and organisations involved in Urban Insights Data Lab have been working together on sharing data and developing data-driven strategies for sustainable urban development.

We present our learning and celebrate the results of the project!
